

EV INFRASTRUCTURE

Spark Power provides seamless implementation and integration of electric vehicle (EV) charging systems.

What it is

Spark Power provides our customers with turnkey, end-to-end solutions with a wide range of in-house capabilities including design, installation, maintenance, and project management for your EV infrastructure project.

Why you need it

Charging infrastructure represents the future re-fueling stations of passenger and commercial transit. Utilities, liquid fuel providers, and large retailers are in strong positions to enter the EV infrastructure market and provide services as end customers electrify their transportation.

How we provide this offering

Spark Power provides you with direct control over every stage of your EV infrastructure project with our full suite of in-house services. From engineering and equipment procurement, to network monitoring and maintenance of your systems, our team of experts work to ensure your project is delivered on-time and with minimal downtime.

Why Spark?

With over 10 MW of installed capacity, Spark Power has a wide breath of Electric Vehicle Service Equipment (EVSE) experience to support you at any stage of your project.
